

## Complete Filtration Resources, Inc. Statement on Covid-19

**We are here to support you and have taken precautions to ensure this continues to be the case. Do not hesitate to call us if you need help with the operations, maintenance, or continued growth of your facility.**

Complete Filtration Resources, Inc. has received many inquiries into our preparation for and ability to continue to service our valued partners in the industry. Complete Filtration is closely monitoring the situation and as always is keeping safety as our primary focus. We have implemented many strategies to reduce the risk to our employees, supply chain, community and partners over the last two weeks including; monitoring of supply chain, imposing hygiene measures regarding employees coming to our offices, encouraging remote working for the majority of our employees, implementing travel restrictions to absolutely necessary service and support work, eliminating travel to certain parts of the world for non-local employees, restricting supplier visits, and requiring employees with any symptoms to stay at home for a period of 14 days.

We understand the importance of our partners ability to keep their plants operational at all times and feel that these measures will help ensure that we are in the best position to support them when needed. Our employees whom are not under any travel restrictions due to illness or recent travel to high risk areas are here to help. Complete Filtration has the ability to work with your staff through VPN access, video conferencing, phone support, and e-mail to keep your facility operating at peak performance. We will be implementing a screening policy for staff prior to any travel to ensure the safety of others while allowing us to continue to offer our world class onsite service and support. We have employees located across the World allowing us to service many of our customers without traveling through airports if necessary. In addition, our strong and diversified supply chain allows us to continue to provide maintenance parts and replacement membranes.

**Bottom Line is that we are here to support you and have taken precautions to ensure this continues to be the case. Do not hesitate to call us if you need help with the operations, maintenance, or continued growth of your facility.**

Regards,

**Travis White**
