

Client Success

EXCITING EXPANSION IN THE DAIRY INDUSTRY

PROJECT OVERVIEW:

We're thrilled to share the successful completion of a major plant expansion that's set to boost cheese, whey, and water production capacity! It's been an incredible journey working with multiple sub-contractors and seeing this project come to life. The result? A state-of-the-art facility with expanded capabilities and improved efficiencies.

THE CHALLENGE:

To tackle rising material and labor costs, we took a strategic approach: purchasing equipment and fabricating membrane systems two years ahead of installation. While storing the equipment offsite wasn't the norm, it turned out to be a cost-effective solution during the market instability caused by COVID.

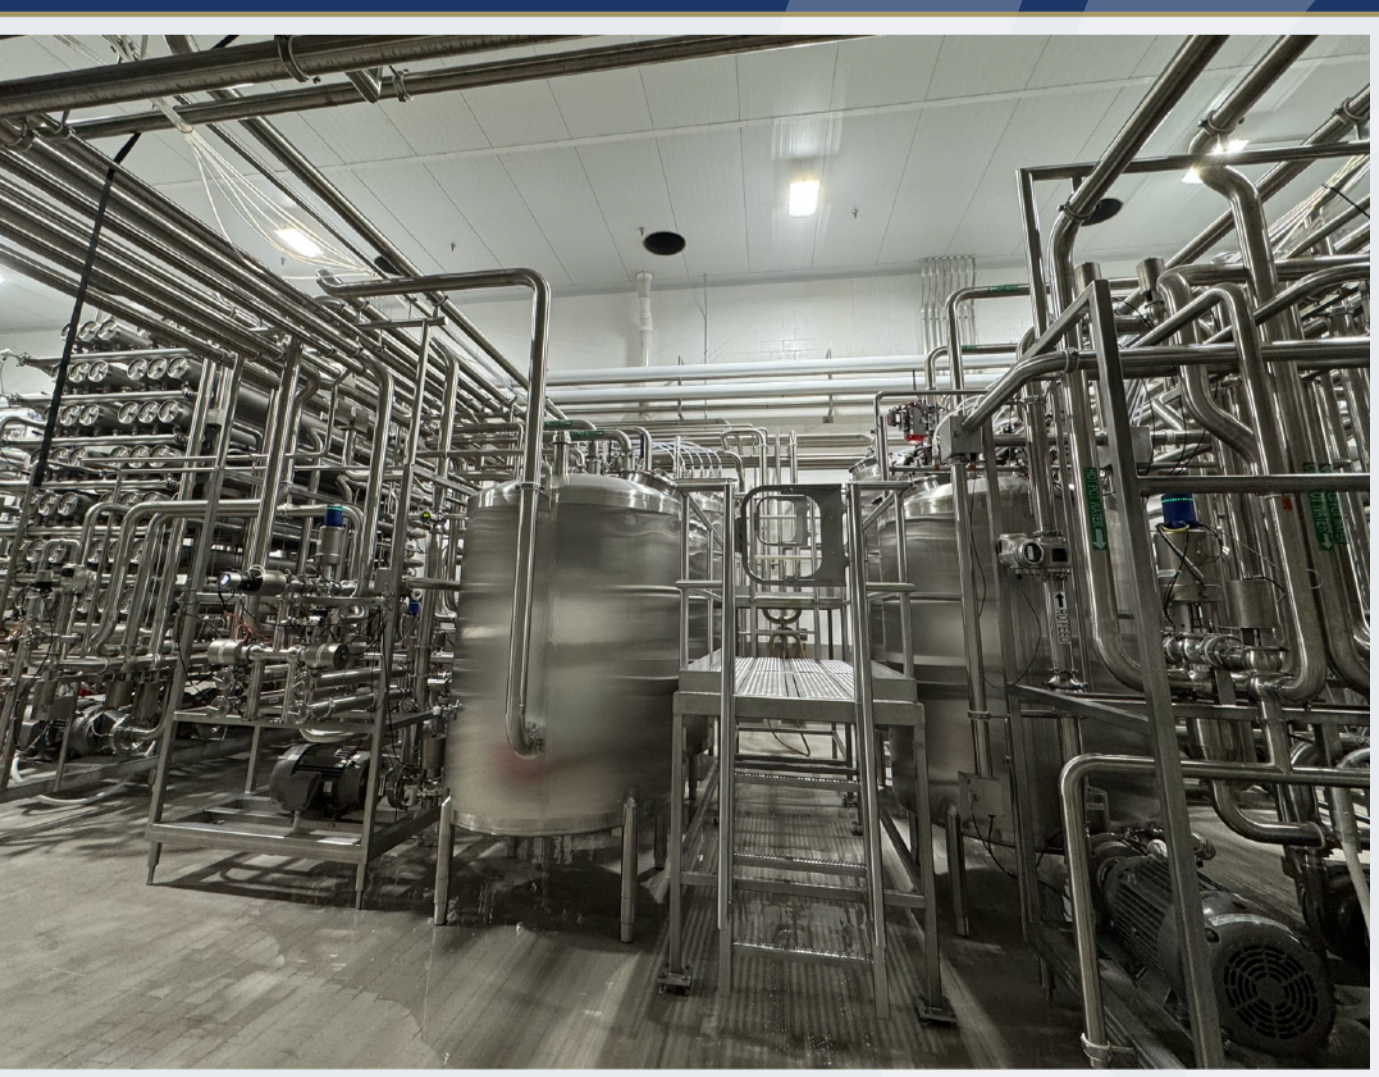

Of course, no project is without its hurdles. Coordinating efforts with multiple teams can be challenging, but thanks to an amazing group of contractors and collaborators, we were able to meet our goals on time, on budget, and with top-notch product specifications.

Client:

Location: South Dakota

Product(s): Cheese and
Whey Projects

THE RESULTS:

- ✓ On Schedule
- ✓ On Budget
- ✓ On Product Specification

We couldn't be prouder of this achievement and the teamwork that made it all possible. When it comes to project success, it's all about planning, persistence, and partnership.
